

10-June – Redruth UK. Holman-Wilfley Ltd is excited to announce the appointment of Advanced Mineral Processing, S. L (AMP[®]) as an authorized distributor of its Gravity Table products for the territories of Spain and Portugal.

Holman Wilfley has a long standing relationship with the Company in these regions and this will expand opportunities with the globally experienced process engineering firm.

About AMP

Advanced Mineral Processing, S.L. (AMP) specializes in process engineering, plant design and systems development to treat mineral ores, sand & gravel, clays and other raw materials produced by different industries, mainly Metallic Mining, Industrial Minerals, Aggregates, Coal and Recycling. AMP enjoys a renowned international acknowledgment for the excellence of its work, integrity, and quality of service, creating added value to client within the dictates of sustainability and environmental preservation.

About Holman-Wilfley

Holman-Wilfley Ltd is a world recognised manufacturer and supplier of Holman and Wilfley gravity separation tables to the mining minerals and metals/plastics recycling industries. A dedicated team of engineers experienced in mineral processing understand the requirements of modern, environmentally driven process operations – and when gravity concentration is still a preferred separation route – Tables remain an economic and user friendly option to achieve the required concentration performance.
