

# SHAKING TABLE

# 2000

## Key Features

- Unit is driven by a Holman head motion with a stroke adjustment of between 10mm and 16mm (nominal).
- Head motion is self lubricating. Simple, robust design requires minimal maintenance.
- Deck is supported on sixteen carriers and is vibrated diagonally along the entire length.
- Decks are made from good quality timber with standard smooth rubber covers for maximum durability.
- Different riffle patterns can be supplied to maximise metallurgical performance.
- Table tilt can be easily adjusted using a hand wheel, even while the machine is in operation.
- Supplied on its own steel base.
- Unit comes complete with direct, on-line starter
- Wear resistant polyurethane “fingers” along the concentrate edge provide accurate cutting of concentrates.
- Wash down hose and spray gun option.
- New design feed box facilitates even solids distribution onto the deck.
- Epoxy coated steel structure is an optional extra.
- Stainless steel water pipe and fittings are optional.

## Typical Applications

- Recovery of precious metals from low tonnage streams
- Recovery of cassiterite and tantalite/columbite from ores
- Recovery of other heavy minerals and materials.
- Recovery of any difficult to treat, fine particle size, heavy material.

## Technical Data

### SHIPPING INFORMATION

Equipment Dimensions  
3386mm Long x 1771mm Wide  
x 1455mm High  
760kgs

### DECK DIMENSIONS

2000mm Long  
Nominal 2.0m<sup>2</sup> deck area  
95 kgs

### ELECTRICAL SUPPLY

Three phase, 380/415V 50Hz  
supply to direct on line starter..

Motor is 1.5kW, 220/240 - 415 Volt,  
three phase 50Hz

### WATER SUPPLY

Wash Water  
5 to 20l/min  
Feed Irrigation Water  
3 parts water to 1 part solids

### SOLIDS THROUGHPUT RATE

2000 Table 60 to 250 kgs/hour
